

# Industrial Coating Services

Our Industrial Coating Blast and Painting services deliver more than just a fresh finish—they provide long-term protection and performance in the harshest environments. From corrosion resistance to fire protection, we offer tailored solutions that meet the demands of companies across New Zealand and Australia.

# Industrial Coating Services

## Comprehensive surface protection

We combine superior surface preparation with high-performance coatings to ensure durability and longevity. Our services include:

- ▶ Surface Inspection & Preparation
- ▶ Material Selection
- ▶ Application & Quality Control

Whether it's a small refurbishment or a large-scale industrial project, our flexible approach ensures seamless delivery across all project sizes.

End to End Solutions

## Specialised coating systems

We offer a wide range of coating technologies to suit your operational needs:

### General & Specialised Paint Systems

Solutions for aesthetic enhancement, corrosion protection, and unique applications.

### Thermal Arc Spray

Advanced metal coatings using electric arc technology for durable, corrosion-resistant finishes.

### Thermal Paints

High-temperature coatings ideal for extreme heat environments.

### Intumescent Coatings

Passive fire protection that expands under heat to insulate and delay fire spread.

## Blasting services

### Abrasive Blasting/UHP

Our fully enclosed facility and mobile teams deliver efficient, high-quality surface preparation using a wide range of blast media, as well as Ultra High-Pressure and High-Pressure water blasting. All works comply with Australian SP1-SP5 and NACE standards, ensuring the highest levels of quality, environmental responsibility, and safety.

- ▶ Removes rust, paint, grease, and contaminants
- ▶ Prepares surfaces for optimal paint adhesion
- ▶ Reduces long-term maintenance costs

### Rope Access

Our experienced rope access team provides safe, efficient industrial coating services while significantly reducing the need for scaffolding and other access equipment – minimising costs, downtime, and site disruption.

## Industrial painting & coatings

Our experienced painters apply protective finishes tailored to your product and environment:

- ▶ Spray Paint & Abrasive Paint
- ▶ Protective & Marine Grade Coatings
- ▶ Powder Coating
- ▶ Epoxy Primers & High-Build Epoxies
- ▶ 2-Pack Polyurethanes & Acrylics

We ensure compliance with all relevant codes and practices, delivering quality-controlled results every time.

## Applications we cover

- ▶ Structural Steel
- ▶ Bridges
- ▶ Chemical and Storage Tanks
- ▶ Conveyors, Hoppers & Chutes
- ▶ Offshore & Sub-Sea Structures
- ▶ Mining Screens & Equipment
- ▶ Plant Upgrades & Reconditioning
- ▶ Pipework & Spool Packages
- ▶ Concrete Coatings Refurbishment

## Protection against the elements

Our coatings defend against:

- ▶ Moisture & Rain
- ▶ Surface Rust
- ▶ Chemical Corrosion
- ▶ UV Exposure
- ▶ Wind & Sand

# Why Choose DIALOG Fitzroy?

Our ISO certified management systems ensure every project meets the highest standards. We are committed to:

- ▶ Qualified industrial painters with experience across the harshest environments
- ▶ Mobile fleet for on-site flexibility
- ▶ Environmentally conscious blasting media
- ▶ Site-specific solutions for demanding environments
- ▶ Integrated scaffolding, mechanical and blast & painting team for site efficiency

# Recent Industrial Coating Services Projects

## Tanks

Internal blast and painting of a very high pH level chemical tank requiring full internal scaffolding to 13 meters, abrasive blasting, epoxy lining including internal pipework & nozzle internals plus testing on the coated substrate.

## Bridges

Regular maintenance, blast and painting of an iconic bridge including encapsulation and environmental protection over a local waterway.

## Structural Steel

Steel pipe bridge removal of rust build up via blasting and painting with non-corrosive paint. All completed at an operational food grade facility.

## Site Maintenance

Cleaning, maintenance repairs, blasting and painting of support beams, stairs, walkways and platforms during a plant turnaround.
