DIALOG Fitzroy

DIALOG Fitzroy delivers end to end design, fabrication and maintenance solutions to companies across New Zealand and Australia.

Building on 65 years of experience; our team of engineering, fabrication, maintenance, procurement and construction specialists work seamlessly with our customers to provide practical, fit for purpose, value driven services.

Our ability to **integrate third party technologies** into our diverse service offering has made DIALOG Fitzroy the trusted partner to design, build and maintain new and existing facilities across any industry.

65+ years Engineering, fabrication, maintenance, project management & construction

Our Values

Do the right thing
We act with integrity and show respect

Be safe
We care for ourselves and our teams, community and environment

Customer focus
We value relationships and provide excellent service

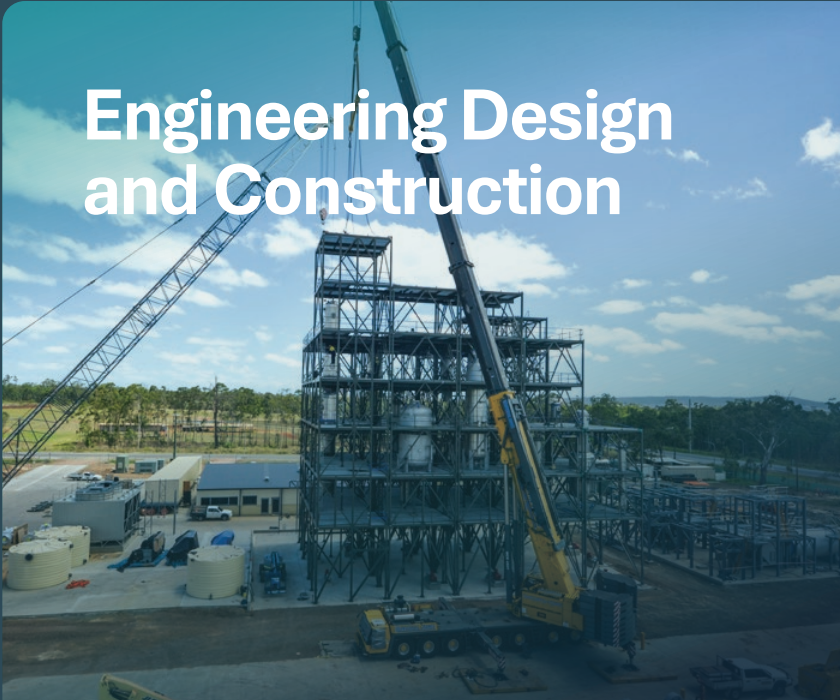

Make it happen
We make it happen

Think outside the box
We think outside the box

What we do

Engineering Design and Construction

Fabrication

Maintenance Services

End to End Solutions

Engineering Design and Construction

At DIALOG Fitzroy, constructability is at the heart of everything we do. From day one, our engineering and design teams collaborate to create practical, fit-for-purpose solutions that meet real-world needs. By integrating our fabrication, procurement, and installation teams, we eliminate the common disconnect between design and construction—transforming “We can’t build it that way” into “We can make it work.” The result?

Smarter, faster, and more efficient execution, led by end-user outcomes.

Engineering

At DIALOG Fitzroy, we engineer for constructability. Our multi-disciplinary team is driven by two essential principles: build-ability and long-term functionality. While traditional consultancy firms often stop at the drawing board, leaving contractors to decode designs, we take a fully integrated, collaborative approach from concept to completion.

By working seamlessly with our procurement, fabrication, construction, and maintenance teams, our engineers ensure every design uses readily available materials, supports efficient construction, and anticipates future maintenance needs. With smart integration of technology and mechanical operations, we deliver solutions that are **practical, cost-effective, and built to last.**

We bring deep technical expertise across multiple domains to drive project success:

- Mechanical Engineering
- Piping Design
- Instrumentation, Controls and Electrical Engineering
- Process Engineering
- Civil/Structural Engineering

End to End Solutions

Project Management

At DIALOG Fitzroy, our seasoned project managers deliver tailored, practical solutions that move projects forward—with precision and purpose. Constructability is central to everything we do. From initial planning to handover, our project managers work closely with you, our internal teams, and trusted subcontractors to create detailed, realistic roadmaps that satisfy stakeholder expectations and meet project goals.

With deep experience across New Zealand and Australia, our team understands the complexities of resource management—people, equipment, and materials—and proactively plans to mitigate risk, uphold quality, and deliver on time and within budget.

More than just delivery, we build enduring partnerships. Long after project completion, we continue to support and guide our clients—because your success is our business.

Fabrication

With over 65 years of proven performance,
DIALOG Fitzroy has engineered and delivered:

1100+
Pressure Vessels

300+
Heat Exchangers

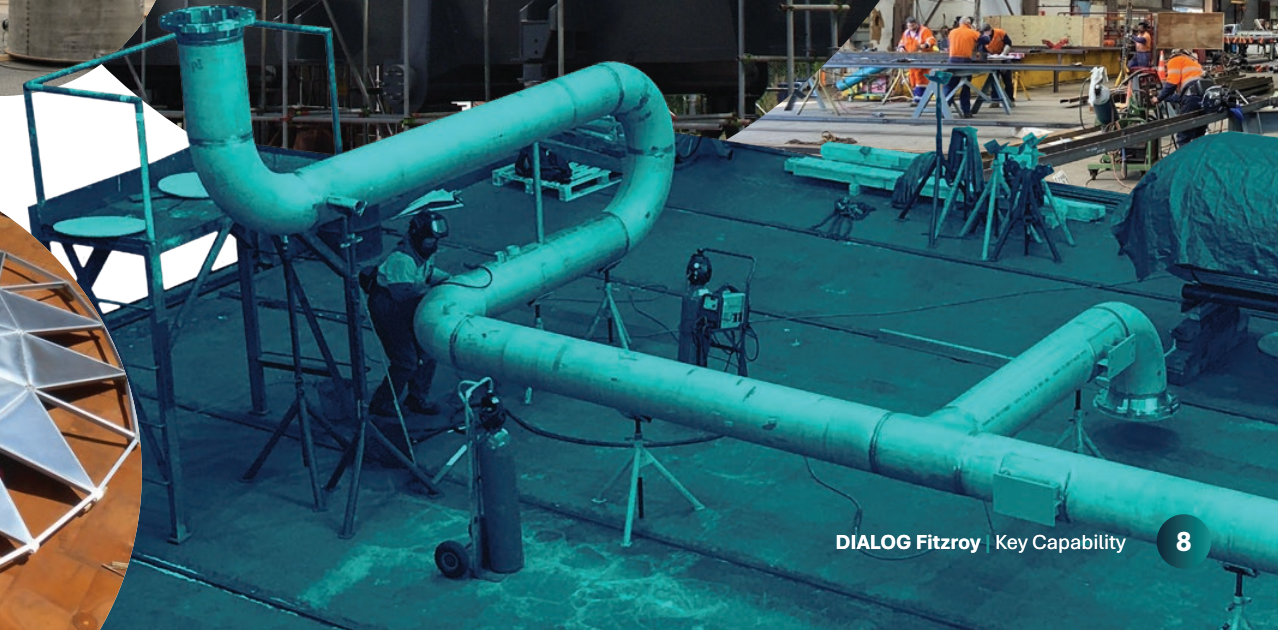

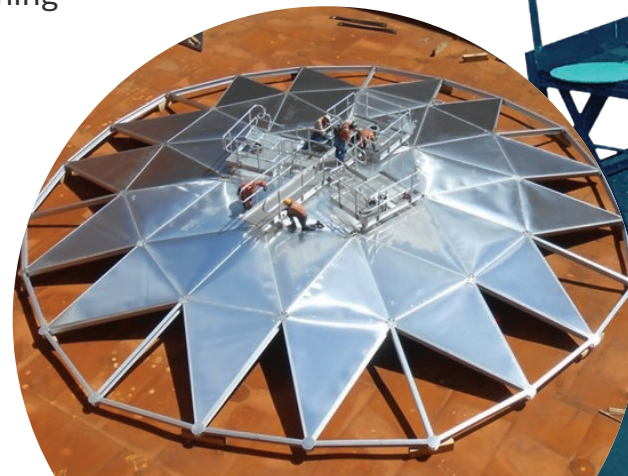

250+
Storage Tanks

From the simplicity of a flange connection to the complexity of an underwater restaurant, we've seen and built it all. And if you bring us something no one's ever done before? Even better. We're ready for the challenge.

Our deep expertise across engineering, fabrication, procurement, and construction means we don't just build—we partner to deliver bespoke, buildable, and enduring solutions that work in the real world

- Pressure Vessels
- Pipe and Spooling
- Tanks
- Structural Steel
- Heat Exchangers
- Machining

○ — End to End Solutions — ○

Fabrication Services

Pressure Vessels

- Process Vessels
- High Pressure Vessels
- Knockout Pots
- Expansions Tanks
- Reactors

Pipe Spooling

- Carbon Steel
- Stainless Steel
- Duplex
- Dairy Tubing
- Chrome Molly and Exotic Materials

Tanks

- Oil and Gas
- Dairy and Food
- Pharmaceutical
- Petrochemical
- 3 Water Facilities

Structural Steel

- Building Frameworks
- Bridges
- Offshore Platforms
- Towers
- Support Columns

Heat Exchangers

- Shell and Tube
- U-Tube
- Aftercoolers
- Driers
- Air Cooled

Machining

- CNC Machining
- Turning and Milling
- On-site Machining
- Alignment
- Pump Overhaul

Maintenance Services

At DIALOG Fitzroy, we know that your industrial assets are the backbone of your operations, and keeping them in peak condition is critical to uptime and long-term performance. Our maintenance services go beyond quick fixes. We deliver comprehensive solutions to protect, preserve, and prolong your equipment's life.

Whether it's immediate mechanical repairs, cleaning, protective coating, safe access solutions, or structural restoration, our team ensures your facilities are safeguarded against corrosion, wear, and unexpected downtime.

And it doesn't stop there. We work with you to develop tailored, long-term maintenance strategies that reduce unplanned outages, cut repair costs, and extend asset life, hence maximising efficiency and reliability over time.

- Mechanical Services
- Tanks and Terminals
- Plant Turnarounds
- Scaffolding and Access
- Industrial Coatings
- Rigging and Cranage

○ ——— End to End Solutions ——— ○

Maintenance Services

Mechanical Services

- Onsite Repairs and Machining
- Piping, Tanks, Structural Steel, Rotating Plant Repairs and Maintenance
- Specialist Welding and Fabrication

Tanks and Terminals

- Tank and Terminal Repairs
- Onsite Blasting and Painting
- Tank Recertification Management
- Tank Conversions

Plant Turnarounds

- End to End Solutions including Scaffolding, Mechanical and Industrial Coatings
- Emergent Engineering and Mechanical Experience
- Extensive Experience across multiple industries

Scaffolding and Access

- Full Scaffolding Systems
- Specialised Equipment including Hanging Scaffolds, Quikdeck and GedaLifts
- Access Services including confined entry and working over water

Industrial Coatings

- Full range of blasting technology
- Full range of industrial coating including 3 coats, high temp, antifouling and intumescent
- Specialised Chemical Coatings from food safety to petroleum

Rigging and Craneage

- Project Planning
- Heavy Industrial Rigging and Mechanical Craneage
- Specialised Lifting including tight spaces and complex industrial sites
